FOREWORD

- 1. The Economic Indicators provide up-to-date information on changes in the domestic and external economic activities of the major non-Communist developed countries. To the extent possible, the Economic Indicators are updated from press ticker and Embassy reporting, so that the results are made available to the reader weeks—or sometimes months—before receipt of official statistical publications. US data are provided by US government agencies.
- 2. Source notes for the Economic Indicators will be published quarterly. The most recent date of publication is 10 September 1975. Comments and queries regarding the Economic Indicators are welcomed.

Approved For Release 2001/03/06: CIA-RDP86T00608R000500130020-2

NOTE: Data are seasonally adjusted. Unemployment rates for France are astimated. The rates shown for Japan, Italy, and Canada are roughly comparable to US rates. The rates for France and the United Kingdom should be increased by about 30% and 15%, respectively, and those for West Grimany decreased by 20% to be roughly comparable with US rates.
